

VSPT Summary

March 10, 2011

21st Century Learning Strategies

We will create an environment where students take ownership of their own learning.

1. We will identify each student's learning style.
2. We will design instructional opportunities to capitalize on student's preferred learning styles.
3. We will coach teachers to be facilitators.
4. We will create student centered environments.
5. We will align our assessment process with our instructional process.
6. We will collaborate and communicate with parents, teachers and students.

Accountability

We will implement a system to identify goals and expectations that will promote accountability for all stakeholders (Board of Education, administrators, all staff, students, parents, community).

Facilities and Grounds

We will develop, revitalize and maintain an appealing 21st century school campus, so that we provide an exceptional learning environment that is also the centerpiece of our community.

Personalized Learning

We will solicit parent involvement, develop staff, assess students, and provide necessary resources in order to create a personalized learning plan that will allow us to:

1. Adapt to different learning styles
2. Build on students' strengths and aspirations
3. Ensure student accountability for their learning
4. Facilitate caring and respectful relationships with students and parents.

Student Achievement

We will continually raise all student achievement levels by engaging students in their learning and assessment.

1. We will integrate technology, clearly communicate learning targets, & regularly measure on going progress.
2. We will share data among students, parents and staff in a timely and meaningful way.
